
SAFETY SCHEDULE n° 255

1. Product identification and Company

1.1 Product Identification

Name: **DECOR PAINT (Decorative Line)**
Description/use: Water-based decorative paint, for internal surfaces, available in version: polished, satin, matt.

1.2 Company Identification

Company name: COLORIFICIO ARCO S.p.a.
Address: Via Adige n° 1 – Zona Industriale.
City and State: 66020 SAN GIOVANNI TEATINO (CH) - Italia -
Telefono: 085 / 4462232 Fax: 085 / 4461803
Emergency telephone number: 085 / 4462232
Mail address: laboratorio@colorificioarco.it

32 Indication of dangers

2.1 Classification of the product.

The product is not classified as dangerous according to the provisions as 67/548/CEE laws and 1999/45/CE and subsequent adjustments. Therefore the product needs a safety schedule in conformity with 91/155/CE directives and subsequent modifications. Other information regarding risks for the health and environment are reported on 11 and 12 of this schedule.

2.2 Classification of dangers

Thermic decomposition produces Oxide, Carbon dioxide and Silicate oxides.

3. Composition/Ingredients information

Product with a base of acrylic dispersion, not considered dangerous.

4. First aid measures

Not reported episodes of damages for the health. Even though it is always advisable to respect good industrial hygiene rules.

Ingestion: rinse the mouth with water. Consult a physician in case of uneasiness.

Inhaling: move the patient away from the source of exposition. Consult a physician in case of uneasiness.

Contact with skin: take the clothes off and rinse the skin with water. Consult the physician in case of persistent skin irritation.

Contact with eyes: wash with water for at least 10 minutes. Consult a physician in case of uneasiness.

5. Fire measures

No classified as flammable. Cool the containers in order to avoid eventual decomposition of the product and the consequent development of potentially dangerous products. In case of fire, always wear safety equipment.

Extinguishing methods: atomized water, foam CO₂, dry chemical product. For information regarding protection of environment, see sections 6 and 12 of this schedule.

6. Measures in case of accidental loss

Avoid contact with skin and eyes. Cover the loss with inert products. Gather the loss and wash away eventual residues by spraying water (if there are not contraindications). For information on environmental and sanitary risks and protection see other sections of this schedule.

7. Manipulation and storage

Always have the availability of cooling system equipment. Store and open the containers only in ventilated areas. Avoid to breath the vapours. Avoid contact with eyes and skin. Store with temperatures between +5°C and +35°C. Protect from frost. For information on environmental and sanitary risks see other sections of this schedule.

8. Individual Protection/Exposition Control

Follow the good hygiene rules by wearing gloves, masks, glasses and work-suit.

Do not eat or smoke during the job; always wash the hands before eating or at the end of the shift. It is always advisable to make periodically medical check ups.

9. Physical and chemical properties

Physical state:	Fluid viscous.
Colour:	White, neutral and other.
Odour:	Characteristic.
Ph:	8 – 9.5 at 23 ± 2°C.
Flammable point:	> + 56°C.
Solubility:	Soluble in water.
Specific weight:	Kg./lt: 1,30 ± 0,10 at 23 ± 2°C.
Boiling point:	N. D.
Combustive capability:	N. D.
Explosive capability:	N. D.
Vapour tension:	N. D.
Evaporating speedness:	N. D.
Division Coefficient:	N. D.
(n-ottanole / water)	

10. Stability and reactivity

The product remains stable if stored and used in normal conditions. In case of thermic decomposition or in case of fire, some dangerous vapours can develop.

11. Toxicologic Information

There are not reported any episodes of damage for the health caused by the exposition to this product. Can provoke irritation in case of contact with eyes and ingestion. In any case it is always advisable to operate following the good hygiene rules.

12. Ecologic infomation

The product does not contain substances classified as dangerous for environment. Use according the right working rules, avoiding to disperse the product into the environment. On sections 10 and 16 are reported other data on toxicologic dangers, biodegradability..

13. Considerations on disposal

Examine the possibility of burning the product, after eventual addition of fuel, in incinerators: see art. 6 of 94/67 CE directive DM 114 of 25/02/2000. In case of acid or basic product, it is always necessary to make the neutralization before any treatment.

In case of solid refusal, it is possible throw it into a dump, that must have the characteristics reported on 1.2 and 4 points of the mentioned directive. This criteria is also valid for empty containers, after correct washing. Never throw it into sewage.

14. Information on transportation

The transportation must be done in original packaging or in packaging that cannot be attached by the content or not subjected to dangerous reactions. In any case, the product is not classified as dangerous for the transportation.

Road or railroad transportation: No indication.

Maritime transportation: No indication.

Air transportation: No indication.

15. Rules Information

The product does not need danger labelling as reported on 67/548/CEE and 1999/45/CE and subsequent modifications and adjustments.

16. Other Information

This schedule has been written by following the directives.

GENERAL BIBLIOGRAPHY:

- 1 – Directive 1999/45/CE and subsequent modifications.
- 2 – Directive 67/548/CEE and subsequent modifications and adjustments (XXVIII technical adjustment).
- 3 – Directive 91/155/CEE and subsequent modifications.
